University

# Spiral or cycle?

How the Library can help you to navigate the research process.

Ms Gabby Lamb, Subject/Contact Librarian at Caulfield  
MNHS (Social Work)

MONASH  
University

## Ingrid Keene

Photo by Daniel Xavier from Pexels

Ingrid Keene completed her PhD at the University of Queensland: *'Addiction recovery and methamphetamine availability: cohort study in Brisbane, Qld'*.

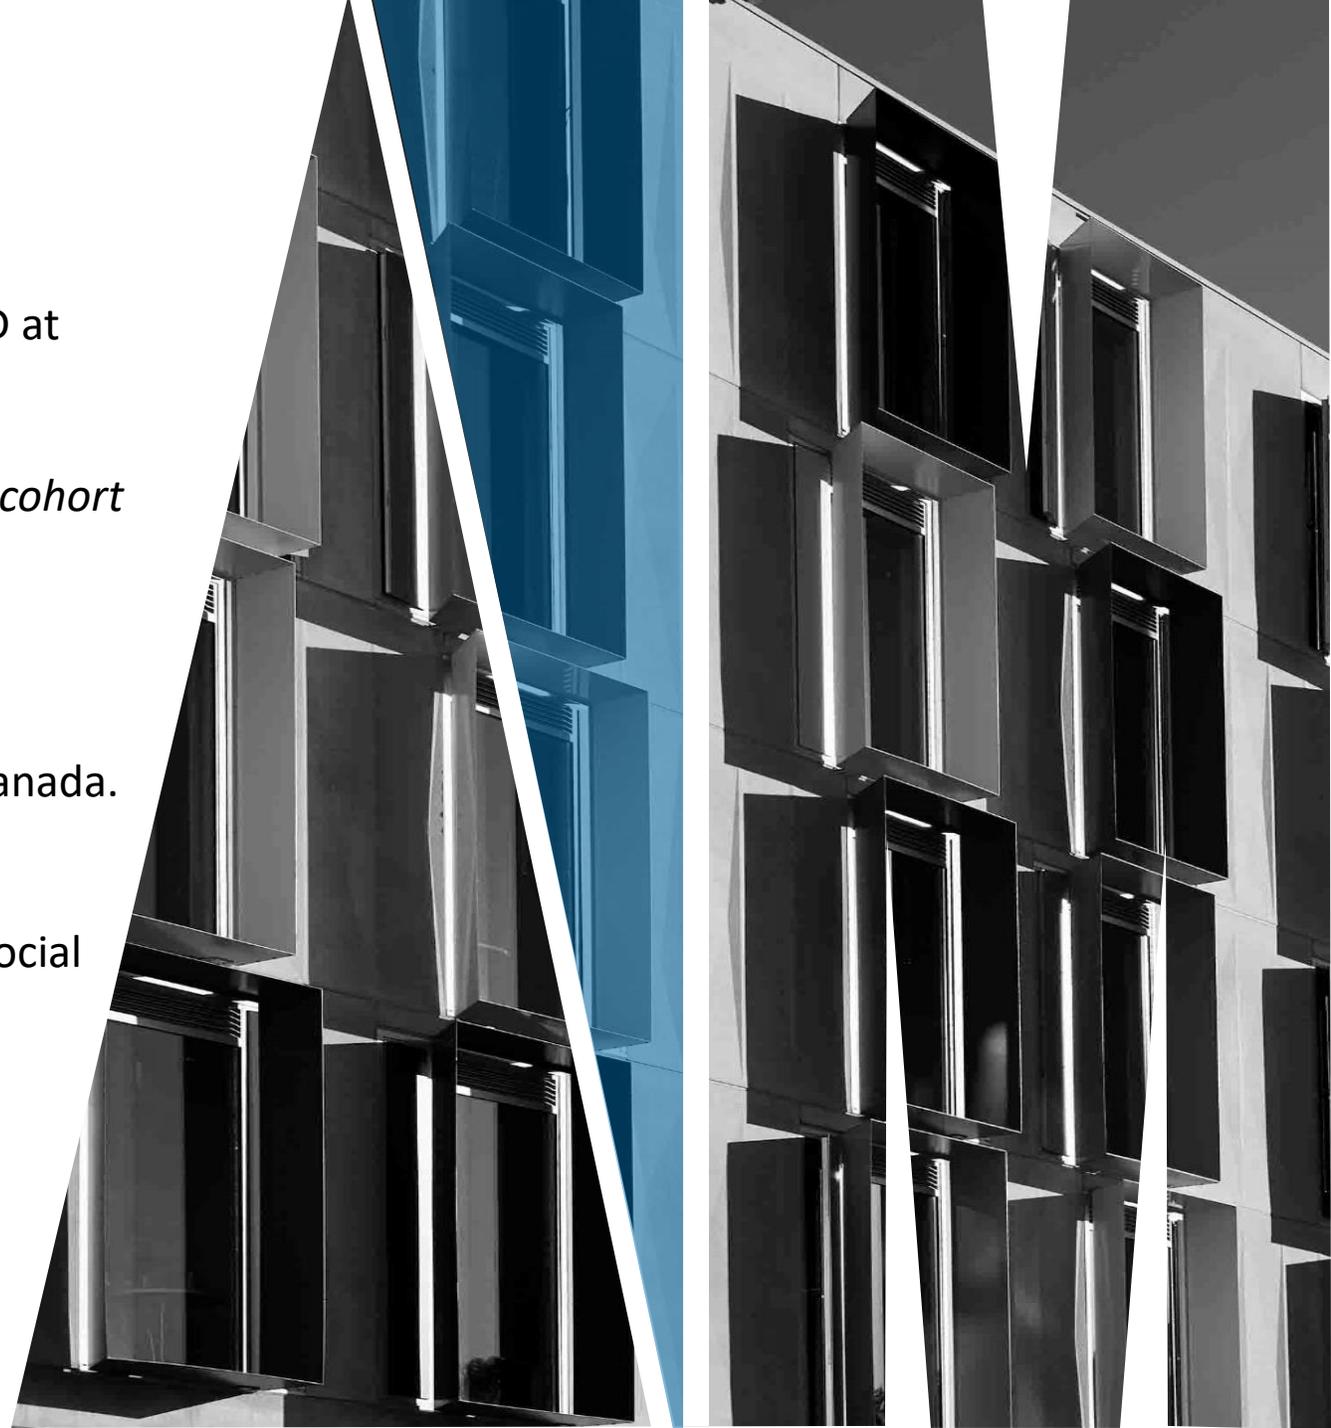

She has several journal articles published and has presented at conferences, most recently in Canada. She enjoys knitting circles and motorsports.

She will be based at Caulfield, Social Work department, teaching and engaged in research.

[@IMKeene](#)

**SPOILER  
ALERT!!**

Ingrid is not real

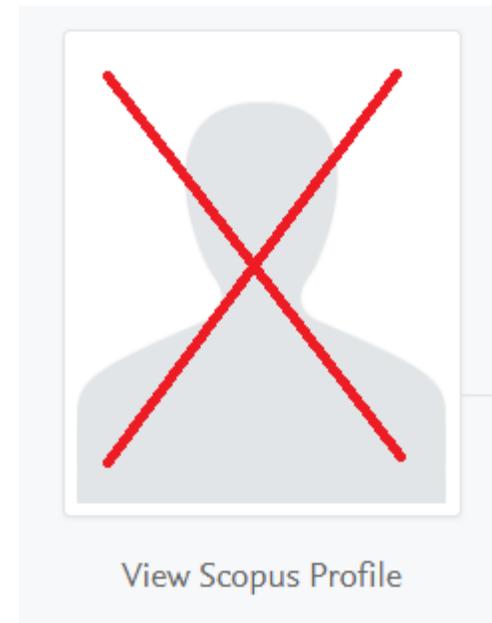

The Research Lifecycle will connect you with the tools, information and advice for each stage of your research.

# Online research profiles

Researcher profile tools can help you to ensure that all of your research outputs are correctly attributed to you, and they can also help you to measure the impact of your research

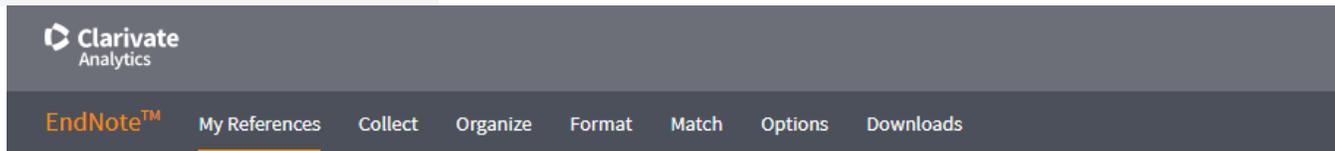

- Choose profile platforms that will rank highly on Google
- Make sure you have edited your Monash 'Pure' profile
- Create an ORCID
- Link your profiles together if you can
- Get active on social media?
- Any photos of yourself should look professional
- Your biographies should reflect you
- It's better to manage 3 well, than 10 badly

# EndNote – love it or hate it?

# Maximise your research impact

- Strategies for promoting your research
- Utilising metric tools ( $h$  index, impact factor)
- Tracking engagement with your research post-publication using social attention tools

The screenshot shows the Web of Science interface. At the top, there are navigation tabs for 'Web of Science', 'InCites', 'Journal Citation Reports', 'Essential Science Indicators', 'EndNote', 'Publons', and 'Kopernio'. The main header includes 'Web of Science' and the 'Clarivate Analytics' logo. Below this is a search bar and navigation options like 'Search Results', 'Tools', 'Searches and alerts', 'Search History', and 'Marked List'. The main content area displays the title 'Operationalizing evidence-based practice: The development of an institute for evidence-based social work' by Regehr, C (Regehr, Cheryl); Stern, S (Stern, Susan); Shlonsky, A (Shlonsky, Aron). It also shows the journal information: 'RESEARCH ON SOCIAL WORK PRACTICE', Volume: 17 Issue: 3 Pages: 408-416, DOI: 10.1177/1049731506293561, Published: MAY 2007, Document Type: Article, and a link to 'View Journal Impact'. On the right side, there is a 'Citation Network' section showing 'In Web of Science Core Collection' with a score of 51 and 'Times Cited'.

# Text and data mining at Monash University

Our library guide offers the research community a place to view:

- licensed scholarly resources that allow text and data mining (to an extent),
- a list of useful open data sources
- case studies
- researcher community developments
- and licensing and copyright guidance

<https://guides.lib.monash.edu/text-mining>

# It's all about data

Strategic publishing includes strategic sharing of your research data

Do you need to comply with funder agreements?

Does your institution, faculty or school have a policy?

What is 'best practice' for collecting, storing and sharing your data?

"Open data and content can be freely used, modified, and shared by anyone for any purpose"

<http://opendefinition.org/>

## Have you got a Research Data Management plan?

"Effective data management is an important part of ensuring open access to publicly funded research data. Data management planning from the beginning of a research project helps to outline how data will be collected, formatted, described, stored and shared throughout, and beyond, the project lifecycle."

<http://www.arc.gov.au/research-data-management>

## Data citation

Why cite data? Data journals How to cite open data  
Impact of data citation The State of Open Data Report

"Data citation refers to the practice of providing a reference to data in the same way as researchers routinely provide a bibliographic reference to outputs such as journal articles, reports and conference papers. Citing data is increasingly being recognised as one of the key practices leading to recognition of data as a

## Funder Open Data statements

ARC - Australian Research Council NHMRC  
Wellcome Trust Plos Journals

"Since 2007, the ARC has encouraged researchers to deposit data arising from research projects in publicly accessible repositories. The ARC's position reflects an increased focus in Australian and international research policy and practice on open access to data generated through publicly funded research."

<http://www.arc.gov.au/research-data-management>

Your Subject/Contact Librarians can provide a range of services and advise you on how to use resources that can help you throughout the research process:

- Data management
- Systematic reviews
- Citation management
- Text and data mining
- Writing about your research
- Publishing
- Journal and article metrics
- Researcher profiles
- ... and much more
