MY DIGITAL TOOLKIT

OpenRefine  jupyter  python  figshare

HOW I USE MY FAVOURITE TOOL TO ENHANCE MY WORK: Whether it’s importing research materials into monash.figshare or a collection of digitised rare books into Monash Collections Online, OpenRefine enables me to rid my source data of troublesome inconsistencies and characters that would either break the upload script or render the metadata unusable for researchers. OpenRefine allows me to work more efficiently, cleans my data, and helps me deliver accessible research collections.

NEW TOOLS I’M INTERESTED IN: #DATAVIZ

@BEPPOBETH
(MOSTLY DIGITISATION AND BASEBALL, BUT THE TYPOS WILL KEEP YOU AMUSED)
