# INTRODUCTION

*The AMEP Digital Literacies Framework and Guide* and this companion *Teaching Resources* booklet are an outcome of the Monash University research project, *AMEP Digital Literacies Framework and Guide: Supporting Pedagogies for Digital Literacies in the Adult EAL Contexts*, conducted in 2021-2022 by Dr Katrina Tour, Dr Edwin Creely, Dr Peter Waterhouse, Professor Michael Henderson and Dr Xuan Pham. This empirical research explored the digital needs and strengths of adult English as an Additional Language (EAL) learners from migrant and refugee backgrounds as they settle in Australia.

*The AMEP Digital Literacies Framework and Guide* presents a conceptual model incorporating educational theories and key considerations about learning that will guide educators in designing and facilitating relevant and effective learning experiences. It also includes a collection of 15 learning units that reflect this model, as well as ideas about best practice for digital literacies in adult EAL contexts.

This booklet includes teaching resources which were designed and piloted by EAL teachers, with their learners participating in this research project. This booklet does not attempt to address all of the units in *The AMEP Digital Literacies Framework and Guide*; however, these resources do relate directly to five units. The numbering of the lesson plans relates to units from *The AMEP Digital Literacies Framework and Guide*. These teaching resources illustrate how *The AMEP Digital Literacies Framework and Guide* can be used in practice, and each of these lesson plans includes:

- a link to The EAL Framework;
- a sequence of lessons outlining procedures and activities;
- relevant teaching materials, including worksheets, discussion questions and instructional videos created by teachers;
- links to *The AMEP Digital Literacies Framework* and its key principles.

This resource can be useful for both novice and experienced teachers. It may appeal to educators at different career stages who are aspiring to connect theory and practice more effectively when planning for and teaching digital literacies.

It is important to appreciate that these reconstituted lesson plans represent data from the research. They have been provided generously by teachers participating in the trial of *The AMEP Digital Literacies Framework and Guide*. They are not offered here as a paradigm for best practice. Rather, they provide generative and emerging examples of situated and developing work in a new and challenging area of professional practice. It is essential that educators utilising these ideas also reinterpret, adapt and recontextualise these practice examples to fit their own learners' authentic needs, purposes and contexts.

Hey Nic,

How are you going?

Thanks for sending me the photos from your holiday. It looks like you had a great time!

How're Leah and the kids? And what about your dog, Snoopy? He was just a puppy last time I saw him.

I'm sorry that I couldn't get to your birthday party. I would have loved to come but I was really busy at work and it was hard to get away. Thanks for the invitation though.

Would it be possible for you to send me some photos from the party? I'd love to see how it all went.

I can't wait until you come to visit in March. Do you know how long you'll be staying? I'll try to think of some fun things to do.

See you soon.

All the best,

Jack
